CHRIST'S COLLEGE
CANTERBURY

MATHEMATICS EXAMINATION

The questions vary in their level of difficulty, starting from where we would expect Year 8 students to be, moving towards very challenging problem-solving. The test is multiple choice, so students do not need to show working. They are encouraged to do working out on a separate sheet of paper where required.

Please bring a soft pencil and eraser to fill in the bubbles on the answer sheet.

Calculators are not permitted.

ENGLISH EXAMINATION

The English examination tests a range of language skills including comprehension of unseen poetry, prose and short non-fiction texts; descriptive or creative writing; response to visual texts; and effective employment of grammar and punctuation. Candidates' strengths in reading and viewing for inference and in writing for figurative effect will support their success in this examination.

Please note: This is the only information provided about these examinations. We do not issue copies of past papers and do not post results or placings.
